**IR1 INTRO 2.**

Earlier in the interview, you mentioned having periods that lasted several days or longer when most of the day you were very irritable, grouchy, or in a bad mood. People with episodes of this sort often have other problems at the same time. These include things like changes in sleep, appetite, energy, the ability to concentrate and remember, and feelings of low self-worth. Did you ever have any of these problems during one of your episodes of being very irritable?
