REFUSED .............................................................9
Many women find that their mood becomes much worse in the week before their menstrual period and then returns to normal within a few days after their period starts. The changes in mood usually involve things like feeling sad, depressed, sensitive, anxious, tense or irritable. Did you ever have a time in your life like this when your mood became much worse in the week before your menstrual period?

YES ......................................................1
NO ........................................................5  GO TO *PS1, NEXT SECTION
DON’T KNOW ........................................8  GO TO *PS1, NEXT SECTION
REFUSED .............................................9  GO TO *PS1, NEXT SECTION

During the time in your life when these mood changes were frequent and severe about how many months out of 12 each year were your moods much worse during the week before your period? (You can use any number between 1 and 12).

_________ MONTHS

DON’T KNOW ........................................998
REFUSED ...............................................999
